25X1 4. [] Met with Mr. Neil Gregory, Administrative Assistant to Congressman George Crider (D., Tenn.), in connection with a letter the Congressman had written to a blind U.S. Government address on behalf of two constituents who had answered a blind ad placed by the Agency [] I explained the general reasons behind our recruitment approach, and Mr. Gregory requested that the addressee of the Congressman's letter write an appropriate response and they would take care of the matter. The applicants had received reject letters and had called the Congressman's office this morning in hopes that he would use his influence to change the decision. [] Medical Staff, is preparing a letter to the Congressman.

25X1

25X1 5. [] Delivered to Mr. Clark Norton, Administrative Assistant to Senator Birch Bayh (D., Ind.), letter to the Senator in response to a letter [] had written to the Senator indicating that the CIA was at the bottom of his problems. Mr. Norton was most understanding that this type of letter is typical of those we occasionally receive from disturbed individuals who see the Agency as the source of their problems and thanked us very much for taking the trouble of dropping by.

25X1 6. [] At the suggestion of Mr. Wendell Figman, Office of Senator Robert Kennedy (D., N. Y.), called Mr. Melvin Levy, one of the prime movers behind the plans of the National Amateur Aquatic Foundation for building an indoor Olympic pool on BFR land adjacent to the Headquarters building, to obtain information on their planning. (See Memorandum for the Record.)

Met with Mr. Wendell Figman concerning the plans for the swimming pool. I indicated that we had been in touch with Mr. Melvin Levy whom he had referred us to and that we were gathering together as many of the hard facts as are available in order for us to be able to come up with a judgment on the matter. Mr. Figman indicated that Senator Kennedy is deeply interested in the project and noted that it will be located fairly near the Senator's home. Senator Kennedy is about to embark on a trip to Europe on Wednesday, and Mr. Figman said that he thought the Senator would like to call Admiral Raborn and get his feeling by Tuesday. I said that that should give us plenty of time. Mr. Figman indicated his feeling that the Aquatic Foundation would be most willing to make such changes as we might deem necessary.
